

TAHA NEJABAT

3D DESIGNER · VISUALISATION ARTIST · CREATOR

Coventry, UK — tnejabtt@gmail.com — tahanejabat.github.io/tahanejabatportfolio

01 — PROFESSIONAL SUMMARY

3D Designer, Visualisation Artist and Inventor with over 5 years of professional experience. Expert in Blender (including custom add-ons), Substance 3D Designer, Substance Painter, V-Ray and VRED. MA in Automotive and Transport Design from Coventry University with industry briefs spanning Vital Auto, HPL, Ford and Nissan Europe. Track record of building tools and systems from commercial PBR material libraries sold globally, to custom Blender add-ons, to working prototypes. Driven by creating things that improve people's lives.

02 — KEY SKILLS

3D & Rendering	Blender (Expert · Cycles/Eevee · custom add-ons) · Substance 3D Designer · Substance Painter · V-Ray · VRED · Twinmotion · Rhino 3D · turntable animation · batch rendering · render passes · HDRI management
Automotive & Surface	Autodesk Alias · Gravity Sketch (VR) · A-class surfacing · clay modelling · CMF strategy · Marvelous Designer · AutoCAD
Material Pipeline	PBR development · material scanning · calibration against physical samples · production-ready asset delivery · colour and trim variants
Design & UX	Figma · Vizcom (AI-assisted rendering) · Adobe Photoshop · Lightroom · Premiere Pro · Animate · Illustrator · Cursor
Development & Tools	Python · C++ (Blender add-on dev) · Geometry Nodes · FBX conventions · render pass thinking · batch automation
Prototyping	FDM/SLA 3D printing · motor-driven mechanisms · soft actuation · silicone casting · physical interaction prototyping
Familiar	Unreal Engine 5 (asset import, real-time lookdev) · 3ds Max

03 — PROFESSIONAL EXPERIENCE

Automotive Designer — CMF & Surface Development

2025 – 2026

HPL · Vital Auto · Gravity Sketch · Coventry University — UK

- Developed CMF and PBR material strategy for HOPE WAV inclusive EV (Vital Auto) — surface finish, material selection and lighting atmosphere communicating safety and emotional reassurance. Designed in Autodesk Alias.
- Shaped CMF direction for HY-ENA (HPL brief) — colour, material and finish strategy grounded in Moroccan architectural and Saharan landscape research.
- Produced Volvo P1800 Reforge — advanced Blender PBR material development: sculptural paint, controlled reflections, Nordic rune symbolism.
- Built centralised Blender material and HDRI libraries to standardise lookdev and accelerate iteration across automotive projects.
- Collaborated with Nissan Europe on retro-futuristic car-truck crossover in Gravity Sketch under official tutors at Coventry University.
- Clay modelling experience from Coventry University studio, HPL clay studio, and Ford concept project.

CMF Artist & Material Specialist

2020 – 2023

Tastic 3D — Shiraz, Iran

- Created production-ready PBR materials in V-Ray sold as a commercial material library to global design studios. Clients spanned architecture, automotive, machinery and product design.
- Used Substance 3D Designer and Substance Painter to deliver fully customised materials for architecture clients including Iravanian Architecting Group.
- Managed full material scanning pipeline — capture, cleanup, calibration and validation against physical samples and reference photography.
- Led trend and lifestyle research to inform material development; performed site visits to assess material integrity.
- Built and maintained centralised material library standardising PBR output quality across multiple concurrent projects.

Designer

2021 – 2024

NerdLaboratory — Remote, Iran

- Produced high-quality 3D visualisations with strong material realism and lighting control for interactive platforms.

- Developed custom Blender add-ons (Taha's Sticker, Workflow Optimizer) in Python — automating material workflows, decal projection and scene organisation.
- Product design, prototyping and rendering for diverse clients using Blender, Rhino 3D, Substance 3D and V-Ray.

Teaching Assistant

2022

Apadana University — Shiraz, Iran

- Assisted in design education, supporting students in visual communication, composition and 3D fundamentals.

04 —

SELECTED PROJECTS

S—01

2024–2025

Blender · Cycles · PBR

Volvo P1800 Reforge — EV Concept

Retro-futuristic EV reimagination. Nordic rune symbolism, Thor's hammer motif. Advanced sculptural paint, controlled reflections and premium highlight readability. Full Blender PBR pipeline.

S—02

2024

Autodesk Alias ·
Blender · CMF

HOPE WAV — Inclusive Electric Vehicle (Vital Auto)

Fully accessible EV for lower-limb disabled users. The wheelchair becomes the car seat — automated docking, universal HMI, cocoon-like interior, rotating base platform. Deep user research including interviews. Sponsored by Vital Auto.

S—03

2025

Prototyping ·
Interaction Design ·
HRI

Soma-Based Mobility Interface

Prototype study on posture, micro-adjustments, and surface response during assisted movement. Explores how surfaces can communicate intent and status through haptic and material cues in human-robot interaction.

S—04

2020–2021

Motor Engineering ·
Physical Prototyping

Curtain Mechanism Prototype

Fully working motor-driven curtain mechanism with automotive motor and custom-designed cylinder. Demonstrates mechanical problem-solving and hands-on fabrication capability.

S—05

2024

Blender · Concept
Design

Ford E-Courier 2040 — Automotive Concept

Cyberpunk LCV for 2040 urbanisation scenario. Drone mothership with roof dispatch bay — solves last-mile delivery and urban theft. Full cinematic 3D presentation and turntable animation.

S—06

2024

Autodesk Alias · CMF ·
Surface

HY-ENA — HPL Industry Collaboration

Affordable vehicle concept for Morocco. Inspired by hyena stance and Saharan wave lines. Moroccan architectural cooling system. Full CMF direction and A-class surfacing in Alias.

S—07

2024

Gravity Sketch · VR

Nissan x Gravity Sketch — Sport Car-Truck

Retro-futuristic car-truck crossover designed in VR. Group project under official Gravity Sketch tutors at Coventry University in collaboration with Nissan Europe.

S—08

2023

Python · Blender · C++

Blender Custom Add-ons — Taha's Sticker & Workflow Optimizer

Two production add-ons: Taha's Sticker automates decal projection and UV placement; Workflow Optimizer streamlines material workflow, scene organisation and batch operations. Both in active personal use.

S—09

2023

Blender · Hard Surface

Foldable Travel Drone

Travel-safe drone with dual-axis folding wings that retract fully into the body. Designed for compactness and protection during transport. Hard surface modelling and cinematic rendering.

S—10

2022

Blender · Hard Surface ·
Animation

Night Fury Space Plane

Futuristic space vehicle concept. Complex hard surface modelling, cinematic atmospheric lighting and animation. Demonstrates advanced Blender capability and visual storytelling.

S—11

2022

Rhino 3D · V-Ray

Kitty E-Bike

Smart e-bike designed for his mother. Designed in Rhino 3D and rendered in V-Ray. Illuminated UI surfaces, volumetric presentation. Personal project driven by emotional intent.

S—12

2022

Brand Design · Visual
Identity

Ford Rebranding

Full visual identity redesign. Brand DNA analysis, competitor research, trend analysis and user insight. Delivered complete rebrand including logo system, colour, typography and motion.

S—13

2025

Vizcom · AI · Concept

Vizcom — AI-Assisted Ideation

12-minute AI-assisted design session expanding one sketch into multiple refined vehicle ideations. Demonstrates fast creative pipeline using AI tools.

05 —

EDUCATION

2024 – 2025

MA, Automotive and Transport Design

Coventry University — Coventry, UK

CMF strategy · Autodesk Alias · PBR workflows · advanced Blender · industry briefs: Vital Auto, HPL, Ford, Nissan Europe

2020 – 2023	BSc, Visual Communication <i>Apadana University — Shiraz, Iran</i> Colour theory · visual perception · lighting and composition · brand identity · typography
2017 – 2019	Associate Degree, Architecture <i>Hafez University — Shiraz, Iran</i> Materiality · spatial form · structural logic · light and volume interaction

06 — C E R T I F I C A T I O N S

Google	Google UX Design Certificate
LinkedIn Learning	UX for AI: Design Practices for AI Developers · Empathy in UX Design · Evil by Design: Persuasion in UX · Prompt Engineering for Generative AI · Rapid Prototyping
